It prevents you and your family from having to pay for expensive hospital procedures should an accident, illness or disability occur in Malaysia or overseas when you and traveling.

MMI Prevention and Wellness Division (MMIPW)

MMI Prevention and Wellness Program

Our Aspirations

Patience, dedication, hard work, good organization, discernment and foresight have turned many of our earlier dreams into reality.

MMI to participate in several prevention and wellness program services and campaigns to bring about an understanding in preventive and wellness education. MMI create an understanding of the extent of consequences that prevention from diseases and can have on our lives when unchecked. MMI focus on five very important areas:

- Research** : To advance understanding prevention of the causes of disease and provide the basis information of new techniques in treatment information and prevention and wellness information and knowledge.
- Public Education** : To develop and implement health educational programs designed to encourage a healthy lifestyle and to assist in preventing disease and accidental.
- Professional Education** : To increase the knowledge and improve the skills of health prevention and wellness program.
- Rehabilitation** : To encourage prevention and wellness programs which promote the rehabilitation of those suffering from diseases.
- Public Service** : To Provide specialist or treatment information who are need medical advice, second opinion or medical treatment reference or information.

Our Future

While we have traveled a long way, there is a tough journey still ahead of us.

The percentage of medically certified deaths attributed to cardiovascular diseases and cancer and has become the No 1 and No 2 killer disease in Malaysia. There still needs much to be done and we certainly ask for your participating. For example, in the next 12 months we aim to extend prevention and wellness program or seminar in Basic Life Support to all Malaysians.

We aim to build an active publishing programme in order to provide resource material to schools, workplaces and the community and develop an active Prevention and Wellness Resource Centre.

We aim to

Work with health professionals to hold wellness seminars for personnel interested in working in areas such as cardiac or cancer rehabilitation or wellness program, nutrition etc.

Expand support for the cardiac or cancer rehabilitation or wellness programs in the community and give them the best chance of a return to a full life following heart attack or surgery. Continue to support health prevention and wellness programs.

Poor health behaviour often starts in childhood. MMI Prevention and Wellness Division (MMIPW) hope to work towards promoting a healthy lifestyle program and prevention and wellness program in preschools and schools with the co-operation of the Ministries of Health and Education.

Our Activities

The tide is turning but major challenges remain.

Awareness or wellness program has been increasing annually with the increase in activities.

Education is the key to healthier lifestyles and prevention.

We also provide resources to students, teachers, employers and community groups and the media.

Many of the ongoing awareness or wellness programs are well known in the community, such as, the Heart or Cancer Week which is held 2 times each year and at different locations in the country.

We bring fun along with a fitness message, and through health screening and forums, we create interest and awareness about risk factors related to cardiovascular diseases, healthy living and heart to the community at large.

MMIPW also works towards creating interest in Basic Life Support. We work with health professionals and conduct demonstrations in the life - saving technique.

Health wellness & prevention programs in schools and workplaces, to encourage provision of healthy food choices and exercise in a healthy smoke-free environment.

Promoting Health Awareness, prevention and wellness program

Encouraging people to change their lifestyles and to help develop environments which make healthy choices easier, are a fundamental part of MMIPW drive to reduce premature death and disability from cancer, heart and circulatory disease and others dread disease.
